AIR 17-308
Audit 1188

March 9, 2017

Mr. Kevin W. Smith, Manager
United States Department of Energy
Office of River Protection
P.O. Box 450, MSIN: H6-60
Richland, Washington 99352

Re: Closeout of Inspection (Audit 1188) 200 East Minor Passive Radial Catch Tank Filters,
Emission Units (EUs) 751, 894, 910, 1129, 1130, 1229, 1231, and 1232

Mr. Smith:

The Radioactive Air Emissions Section (RAES) inspected the subject EUs to determine compliance with the Radioactive Air Emissions License (RAEL FF-01) and Washington Administrative Code (WAC) 246-247. The inspection consisted of a review of documentation on February 16, 2017.

During the inspection it was noted that 240-S-302 and additional emission units in S and SX farms, listed in the audit, were being surveyed on a monthly basis due to an e-mail that required increased surveillance. Our recommendation is to follow the license conditions. All the emission units except the 240-S-302 can immediately revert to a 365 day sampling frequency as listed in the license. 240-S-302 will require a license revision if it is to change to a 365 day sampling frequency.

There were no additional issues noted during the inspection and Audit 1188 is closed upon receipt of this letter. A copy of the inspection report is available, upon your request.

The RAES inspections concentrate on select key compliance issues, but not necessarily all regulations or license conditions due to time constraints. The RAES inspections, alone, are not to be used to demonstrate compliance with RAEL FF-01

If you have questions regarding this letter, or would like to request a copy of the inspection report, please contact Ernest McCormick at ernest.mccormick@doh.wa.gov or (509) 946-0624.

Sincerely,

John Martell, Manager
Radioactive Air Emissions Section
